Mr Jack Heath;

**I did a survey on Monday Morning and found as Many Cars on the Ninth Line as before.
Between 7 a.m and 8.a.m there were over 100 cars going south off the bypass to 14th Ave. Going
North to the bypass with a running stop was 42 cars ,trucks and even a back hoe. Between 8.a.m.
and 9.a.m. there was 119 cars going south to 14th avenue through Box Grove and 48 going north
on a running stop .about 12 making a left turn into the Legacy subdivision
Many Many U TURNS . The cars coming from the Legacy subdivision making a right turn on to
the Ninth Line barely stop, and our driveway is right there.**

**I feel this By-pass as it is called is not working the way we thought it would as the Ninth
Line going south is still as busy as before and also going North.**

**Why is the barrier on the North Side of Rouge Bank Drive and not on the south side to block
off the Box Grove as I thought we were supposed to be hamlet again. If the south side of Rouge
Bank Drive were blocked off the residence here could go to Winterberry Drive to get off the
Ninth Line.**

**I hope I have expressed my feeling right. If you need to contact us we are
GERALD AND EVELYN LILLIE 7914 Ninth line .Markham**

Thank You.

E. Lillie
