

## **C.R. P.A**

**Dear Councillor Heath,**

This is a letter of support regarding your resolution concerning the Cornell Community Center and The Hospital. The CRPA acknowledges the benefits for the Town and the Hospital in doing a joint venture. We see the vision being a success if planned well. Thank you for including the charette in the document showing your commitment to engage the community in the process.

We support and encourage the go ahead so that the Hospital can secure the funds needed to begin. We also realize the benefits to the community. Joining with the Hospital we should see our community center built faster.

We would encourage the continued dialogue with the two school boards. It is an opportunity to allow us to create something really special.

Parking will be an issue. We side with the Mayor in solving the issue sooner rather than later. Councillor Shapero's idea of underground parking although expensive could free up some extra land for other initiatives.

To all those committed to creating something really outstanding for all parties involved we look forward to working with you.

Regards

Renee Torrington CRPA President
